

Model 1260 Single Point Static Bar

The 1260 Single Point Bar is used to neutralise small objects such as yarns, trim and closures.

It is compact and inexpensive.

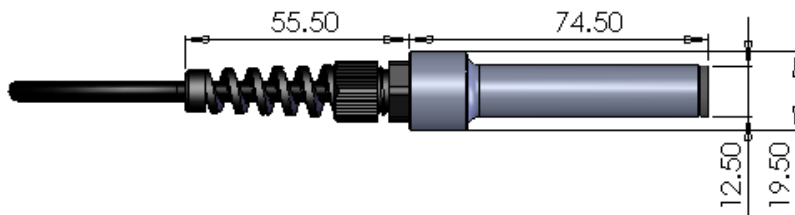

Construction

Stainless steel tube 12.5mm diameter x 60mm long.

Titanium emitter in PVC housing. Resistively coupled for shockless operation

2m of HT cable unless otherwise specified.

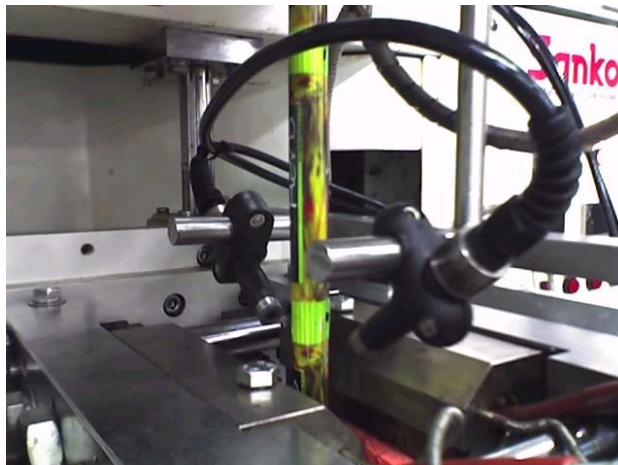

Applications

It can be held in position by standard pipe fittings to neutralise any type of small object.

It is also used in the 4200 Single Point Nozzle and 4400 Ionised Air Nozzle.

1260's on a liquid vertical form fill seal machine.

Notes
