

SOLUTIONS TO STATIC PROBLEMS

CLEANING

CLEANING & DUST REMOVAL

NEUTRALISING STATIC, REMOVING DUST & OTHER CONTAMINANTS.

The 4125 is our most powerful airgun for neutralising static electricity and removing dust and other contaminants. It is available in two variants for top or bottom air feed.

It can and is used to clean and eliminate static in a wide range of applications such as:

- > Cleaning of injection mouldings.
- > Plastic sheeting.
- > Automotive repair and re-finishing.
- > Electrical Components.
- > Medical and pharmaceutical plastics.
- > LCD and screen displays.
- > Even helicopter and jetfighter cockpits.
- > UPVC Manufacture Cleaning.
