

# POWER UNITS OVERVIEW

Fraser has a wide range of Power Units to meet customer requirements.

They offer a choice of:

- connections, 2 or 4
- load capability (combined Bar and Cable length)
- electrical supply
- remote monitoring
- certifications

This is a summary of range - please see individual Datasheets for full details on each model.

HP50-2				
Connections	Max Load	Output V	Certifications	Electrical
2	12m	5.5kV (sinusoidal)	CE, UL, CB	specify 115V or 230V 50/60Hz, IEC Connector

HP50-4				
Connections	Max Load	Output V	Certifications	Electrical
4	12m	5.5kV	CE, UL, CB	specify 115V or 230V 50/60Hz, IEC Connector

Options: remote monitoring of HV status.

HP50-F				
Connections	Max Load	Output V	Certifications	Electrical
4	30m	5.5kV	CE, UL, CB	specify 115V or 230V 50/60Hz, IEC Connector

Options: remote monitoring of HV status, ATEX certification.

HP50-ION				
As HP50-F, but with advanced remote monitoring, showing HV status, need to clean Bars and residual balance in material being neutralised.
